ABSTRACT Geopolitics and business development is a buzz word. There is a serious link between population growth and the environment. This is basically found somewhere between the view that population growth is solely responsible for all environmental ills and the view that more people means the development of new technologies to overcome any environmental problems. An attempt has been made in this article to discuss the geopolitical environment in Namibia and provides a comprehensive picture of the country’s, economy, politics, education and health situation in the country. It also highlights the environment and migration issues in general and how that affects a developing country like Namibia. It further argues that action is required by a broad group of policy makers in Namibia who can take important policy intervention measures that can ameliorate the current business landscape of the country.
