Taste Sensitivity to P.T.C. and Colour Blindness Among the Brahmin of Sundarnagar, Himachal Pradesh

Vikal Tripathy and A.K. Kapoor

ABSTRACT A study of taste sensitivity of P.T.C. and colour blindness among the Brahmins of Sundarnagar of Himachal Pradesh was done. The t gene frequency was found to be 0.4391 in the total population, and that of colourblindness 3.093 % among the males. The results have been compared with the populations of Himalayan region of India. The trait of colour blindness among the populations of Himalayan region has been looked into, in view of the selection relaxation hypothesis
