KEYWORDS Environment. Anthropometry. Tribe. Island

ABSTRACT Onges of Little Andaman belong to one of the scheduled tribes of A & N Islands. In the present paper Onge females have been studied for eight body measurements and eight indices are calculated, usual statistical constants mean, SD, CV and their SEs are also calculated. The result shows that most of the Onge females are short to very short in stature, trunk is medium, legs and arms are long, shoulder medium and pelvic region is narrow. Body is lighter in weight.
