

ABO and Rh (D) Blood Groups Among the Adikarnatakas of Karnataka

M.R. Gangadhar and K. Rajasekhara Reddy

KEYWORDS Scheduled Caste. Adikarnatakas. Mysore

ABSTRACT Data are presented on frequency distribution of the ABO and Rh (D) blood groups among the Adikarnatakas, a scheduled caste population of Mysore City in Karnataka State. In the ABO blood group system O group recorded the highest incidence, followed by B group. The incidence of Rh (D) is 3.16 percent which is in agreement with the majority of the other caste as well as tribal population of this south Indian state.
