

Body Mass Index Among The Dibongiya Deoris of Assam, India

Gitimallika Gogoi and Sarthak Sengupta

KEY WORDS Body Mass Index. Chronic Energy. Deficiency. Nutritional Status. Deori Tribe. Population Variation..

ABSTRACT An attempt has been made in this note to assess the Body Mass Index among the Dibongiya Deoris of Assam with a view to understand their nutritional status. Body Mass Index in majority of the Deori adults, is relatively better compared to other North East Indian populations. The prevalence of chronic energy deficiency is also comparatively low in them
