**KEYWORDS** Action – Inaction – Prohibited Action. Biological Machine. Ideology of Action. Social Stand Point. Work-culture

**ABSTRACT** Bhagavad Gita teaches work-culture to all concerned. Any living system is a biological machine, has to work for self-sustenance. There are fixed channels for expression of actions. The inner ideology of action and external performance leads a being to higher stratum. One evolves through actions only, keenly devoted to natural duty. Work-culture plays an important role to shape up the physical, biological and social ecology of all beings.
