KEYWORDS Genetic Traits. Variation. Gowda. Caste Group

ABSTRACT Data are presented on frequency distribution of the ABO and Rh (D) blood groups among the Gangadikara Vokkaligas of Mysore, Karnataka, India. The O group recorded the highest frequency, followed by A and B. The incidence of Rh (D) negative was 2.67% and the gene frequency of recessive *d* allele was 0.1633. The results of the present study are compared with other caste populations of Karnataka.
