ABSTRACT As part of the process of educating teachers, candidate teachers' attitude towards the occupation itself is an important step to ensure that candidate teachers carry out their duties in the future effectively. The purpose of this study is to determine the attitude of the candidate teachers currently pursuing their degrees in Northern Cyprus towards the occupation of school teaching and their life satisfaction levels and to analyze the relationship between these variables. The results of the study indicate that the candidate teachers have a positive attitude towards the occupation for which they're getting ready and that their life satisfaction levels are high.
