

Index

A

Abdominal adiposity, 101, 109
Absorptiometric, 63
Adaptation, 34
Adipocyte metabolism, 101
Adipose tissue, 35, 63, 66, 91
Adiposity indicators, 23
Adiposity measurement, 28
Adiposity, 23, 27
Adolescent growth, 53
Adolescents, 15
Afro-Americans, 48
Aging, 101
Amenorrhea, 91
Andropause, 91
Anorexia, 20
Anthropology of sports, 36
Anthropometric indices, 31
Anthropometric measurements, 64
Anthropometric profiles, 35
Anthropometric traits, 27
Applied anthropology, 69
Asian populations, 106

B

Bioelectric body properties, 69
Bioelectric impedance analysis, 64
Bioelectrical methods, 63
Biological age, 32
Biological ageing, 91
Biological maturation, 32
Biological rules, 9
Biological status of men and women, 91
Biometric relationship, 6
Black Africans, 48
Blood pressure, 64, 75, 76
Body adiposity, 23
Body build, 101
Body composition, 28, 31, 41, 51, 54, 75, 79, 101
Body fat, 34, 35, 42, 51
Body fatness, 23
Body mass components, 70
Body mass index, 1, 9, 17, 23, 41, 57, 101, 106
Body proportions, 6
Body shape, 1
Body size, 1
Body surface, 33
Bone tissue, 34, 35

C

Carbohydrate, 17
Cardiac output, 91
Cardio-vascular disease, 15, 91, 101
Cardiovascular disorders, 106
Cardiovascular risk factors, 23
Cardiovascular, 75
Caucasians, 48
Central adiposity, 61

Children and youth sport, 36
Chronic energy deficiency, 1

D

De-adaptation, 34
Densitometric, 63
Developed countries, 41
Diabetes, 15
Diabetes mellitus, 79
Dietary and eating habits, 15
Diseases, 35
Dynamical growth type, 33
Dynamometry, 64

E

Economic growth, 98
Ectomorphy, 31
Embryonic development, 33
Endo- and exocrine testicular functions, 91
Endocrine changes, 51
Endomorphy, 31
Energy consumption societies, 5
Energy metabolism, 17
Environmental changes, 96
Environmental determinants, 23
Environmental factors, 23, 28, 97
Environmental variables, 98
Estimation of body fat, 35
Estrogen deficiency, 91, 101
Ethnicity, 2
Extent of overweight, 57
External fatness, 35

F

Familial environment, 23
Fat distribution, 23
Fat free mass, 76
Fat patterning, 101
Fat tissue, 101
Fat-free tissue, 101
Fatness phenotypes, 27
Female gymnasts, 35
Femoral-patellar joint, 35
Fertile lifespan, 91
Functional parameters, 73

G

Genes and environment, 28
Genetic heritability, 27
Genetic pleiotropy, 23
Globalization of food markets, 98
Growth types, 31, 34
Growth and development, 31

H

Hand grip, 64
Health education programs, 15
Health risks, 57

Height body mass, 33
 Heritability, 27
 Human body mass, 37
 Human body tissue resistance, 63
 Human obesity, 28
 Human physiques, 31
 Hypertension, 75, 79, 91, 101, 106
 Hypothalamic nuclei, 34
 Individual growth factors, 33
 Invertebrate systems, 33

I

Isotope dilution, 63

K

Kinanthropometry, 36

L

Leptomorphic, 31
 Lifestyle behaviours, 91
 Low density lipoprotein cholesterol, 60
 Low-density lipoprotein, 97
 Lumbar vertebral bodies, 35
 Lung capacity, 91

M

Macronutrient energy metabolism, 21
 Maturation status, 54
 Maturation types, 54
 Maturation, 51
 Maturity status, 54
 Measure of body fatness, 1
 Menarche, 53
 Menopause, 101, 91
 Mesomorphy, 31
 Metabolic and cardiovascular disease, 48
 Metabolic disturbances, 79
 Metabolic pathways, 17
 Metromorphic-metro-plastic type, 31
 Middle-aged weight status, 98
 Minerals, 17
 Modernization, 98
 Monozygotic and dizygotic twin, 17
 Morbidity, 75
 Morphogenetic, 69
 Mortality, 101, 75
 Motor activities, 36, 37
 Muscle mass, 34
 Muscle building enthusiasts, 1
 Muscle mass, 1
 Muscle strength, 91
 Mutational analysis, 33

N

Niacin, 17
 Nourishment products, 15
 Nutrients, 51
 Nutritional anthropometry, 1

Nutritional requirements, 33
 Nutritional status, 51

O

Obesity epidemic, 6
 Obesity, 41, 57, 75, 91
 Oligogenetic models, 23
 Overweight children, 57
 Overweight, 11, 23, 41, 57, 91

P

Photogrammetry, 36
 Physical activity, 1, 63, 70, 91, 98
 Physical performance, 36
 Physiological capability, 36
 Physiological capacities, 91
 Physiological changes, 96
 Physique types, 31
 Physique, 9
 Plastic index, 31
 Post-menarcheal girls, 51
 Poverty income ratio, 2
 Poverty level, 2
 Pre- and post-spermaarcheal boys, 51
 Pre-menarcheal, 51
 Process of growth, 9
 Protein, 18
 Psychopathology, 31
 Pubertal growth, 54, 68
 Puberty, 10, 33, 51, 66
 Pyknomorphic, 31

Q

Quality of life, 23

R

Race, 2
 Reproductive years, 101
 Riboflavin, 17

S

Scheduled caste, 82
 Secondary sexual characteristics, 51, 64
 Secular advances, 60
 Secular changes, 41
 Secular growth changes, 9
 Selective mortality, 35
 Serum concentrations, 6
 Sex hormone, 21
 Sex organs, 51
 Sex-ethnic, 4
 Sexual and physical maturation, 51
 Sexual dimorphism, 20
 Sexual maturation, 51, 69, 73
 Short and long tubular bones, 35
 Shortness of breath, 106
 Skeletal mass, 1
 Skeletal muscular fiber types, 34
 Skeletal musculature, 34
 Skeletal system, 33

Skeleton mass, 35
 Skin fold measurement, 36, 41
 Skinfold thicknesses, 41, 44
 Skinfold, 57
 Sleep disorders, 79
 Smoking habit, 91, 97
 Socio-economic status, 23
 Somatoscopic diagnosis, 31
 Somatotropical hormone, 34
 Somatotype, 31, 64
 Somatotyping, 34
 Somatotypology, 31
 Specific environments, 23
 Spermatarche, 54
 Sport anthropology, 36
 Sports medicine, 36
 Sports performance, 36
 Sports sciences, 33
 Sports, 32
 Sportsmen, 34
 Stable growth type, 33
 Subcutaneous fat, 27, 41, 88

T

Testosterone, 34
 Thiamin deficiency, 20
 Thiamin, 17

Thyroidalfunction, 34
 Total body fat, 23
 Triglycerides, 60
 Trunk obesity, 23
 Type-2 diabetes mellitus, 101

U

Underweight, 11
 Universal index of energy nutritional status, 1
 Urbanization, 98

V

Visceral adipose tissue, 60
 Visceral fatness, 23
 Vitamins, 17

W

Waist-to-hip ratio, 24, 105, 106
 West African, 48

X

X chromosome, 21

Y

Youth sport, 36
